

COMPANY OVERVIEW

- Global Leader in API Security Management
- US-based Company & Technology Development, founded in 2001
- Industry certified API Security Gateway product

FIPS
140-2

DoD
PKI

NIAP
NDPP

US PATENT
7,516,333

CORE INDUSTRY VALUE PROPOSITIONS

- Essential component for secure API Strategy
- Supports Mobile, Cloud, IoT, and On-Premise technologies
- Centralized API policy-based enforcement
- Modern API cyber-security protection
- Future proof design with standards-based technologies
- Seamless deployment with minimal client or server impact
- Next generation intelligent malware scanning of embedded content

EMBEDDED TECHNOLOGIES FOR EXTENSIBLE AGILE API STRATEGY

No Code Solution for Building and Connecting to B2B, Mobile, Cloud and IoT APIs

API Cyber-Security Protection

API Data Transformation

API Data Leakage Protection

API AV Scanning

API TLS Acceleration

API Access Control

API Mobile App Security

API Encryption

API SSO

API Data Filtering

API Protocol Conversion

API Monitoring

API Legacy to Modern Conversion

API High Availability

API Load Balancing

KEY FEATURES

FORUMSENTRY

API SECURITY GATEWAY

HARDWARE

WINDOWS

LINUX

SOLARIS

VMWARE

CLOUD

API Security:

- Prevents top API threats. Industry-only FIPS-140-2 and NDPP certified API security with integrated API firewall.

API Identity:

- API Access Control and Single-Sign On.
- Supports all API identity formats.

API Integration:

- Build APIs or integrate to APIs with no coding.
- Converts protocols and data formats bi-directionally.

API Monitoring:

- Full auditing of API traffic with Big Data and predictive analytics, heuristics and information analysis.

FORUM SENTRY API SECURITY GATEWAY FIPS 140-2 AND COMMON CRITERIA NDPP CERTIFIED TECHNOLOGY THAT ENABLES:

- **Enforcing** identity and data security together seamlessly as a bi-directional capability
- **Building** APIs with no code and minimal environment disruption
- **Centralizing** identity and security posture across modern and legacy services
- **Enabling** integration to untrusted parties
- **Securing** information borders for privacy and information assurance
- **Deploying** purpose-built security product for modern security enforcement

FORUM SENTRY API SECURITY GATEWAY SEAMLESS DEPLOYMENT WITHIN ANY COMPUTING ENVIRONMENT

- Services and Applications:** Mobile, Cloud, B2B, IoT, Web Apps, Portals. Plug-and-play integration to any network architecture
- Identity Formats:** AD, LDAP, Adapters for all IdM systems and SaaS providers, SAML, OAuth, OpenID Connect
- Transport Protocols:** Protocol translation among HTTP, FTP, JMS, SMTP, and AMQP formats

TARGET MARKET PERSONNEL

- Information Technology
- IT Security
- Enterprise Architecture
- Application Development
- Identity Management
- Business Monitoring

EDUCATION AND SUPPORT

- Whitepapers and Education Briefs
- Security, Enterprise Architecture
- Webinars
- Online Certification Training
- On-demand feature demonstrations
- Implementation support
- Industry best practices

DEMO SENTRY

Are you Sentry Secured?
